Example 4. Washing clothes in washing machine

Step 1. Start.

Step 2. Put washing powder in the space marked for it.

Step 3. Fill the washing tub with water.

Step 4. Put in the clothes and shut the door.

Step 5. Set the timer and switch on the machine.

Step 6. Wait till the washing is complete.

Step 7. Open the door and take the clothes out.

Step 8. Stop.

Example 5. Planting a sapling in the soil

Step 1. Start.

Step 2. Dig a hole in the soil.

Step 3. Put the sapling inside the hole.

Step 4. Fill it with soil.

Step 5. Give water to the plant.

Step 6. Stop.

Work of Students...

Can you think of some other work which has smaller steps?

Example 2. Cooking vegetables

Step 1. Start

Step 2

Clean and cut vegetables.

Step 3

Heat oil in a frying pan on fire.

Step 4

Fry vegetables by putting them in oil.

Step 5

Put spices and salt.

Step 6

Stir and wait.

Step 7

Remove from fire.

Step 8

Serve the food.

Step 9. Stop

4.3 How to Write an Algorithm

Example 1. Making a shirt

Step 1. Start

Step 2

Cut the piece of cloth as per the measurements.

Step 3

Stitch the various parts.

Step 4

Stitch the buttons

Step 5

Iron and fold the finished shirt.

Step 6. Stop

iii. Making a cake

iv. Washing clothes in washing machine

v. A girl planting a sapling

Example 3. Making a cake

Step 1. Start

Step 2. Mix flour, sugar, baking powder, eggs, butter in a baking bowl.

Step 3. Pre heat oven.

Step 4. Put the baking bowl in the oven and bake for 40 min.

Step 5. Take out and put icing on its top.

Step 6. Serve with a smile.

Step 7. Stop.

Example 4.

Step 2. Put w
in the space

Step 4. Put i
and shut the

v. A

EXERCISE

Q1. Identify the following.

i. It is the first screen that appears when the computer starts.

ii. It is the bar found at the bottom of the desktop.

iii. These are small images, which connect us to respective applications.

iv. It is the most important software of a computer.

v. It provides a faster way to open programs that are frequently used.

Q2. State True or False.

i. The taskbar contains the desktop.

ii. Various icons are visible on the desktop.

iii. MS Windows is a popular hardware.

iv. Quick Launch Bar is a group of buttons placed next to the Start button on the Taskbar.

v. The Shortcut menu appears when you left-click on any item.

3.4 Shortcut Menu

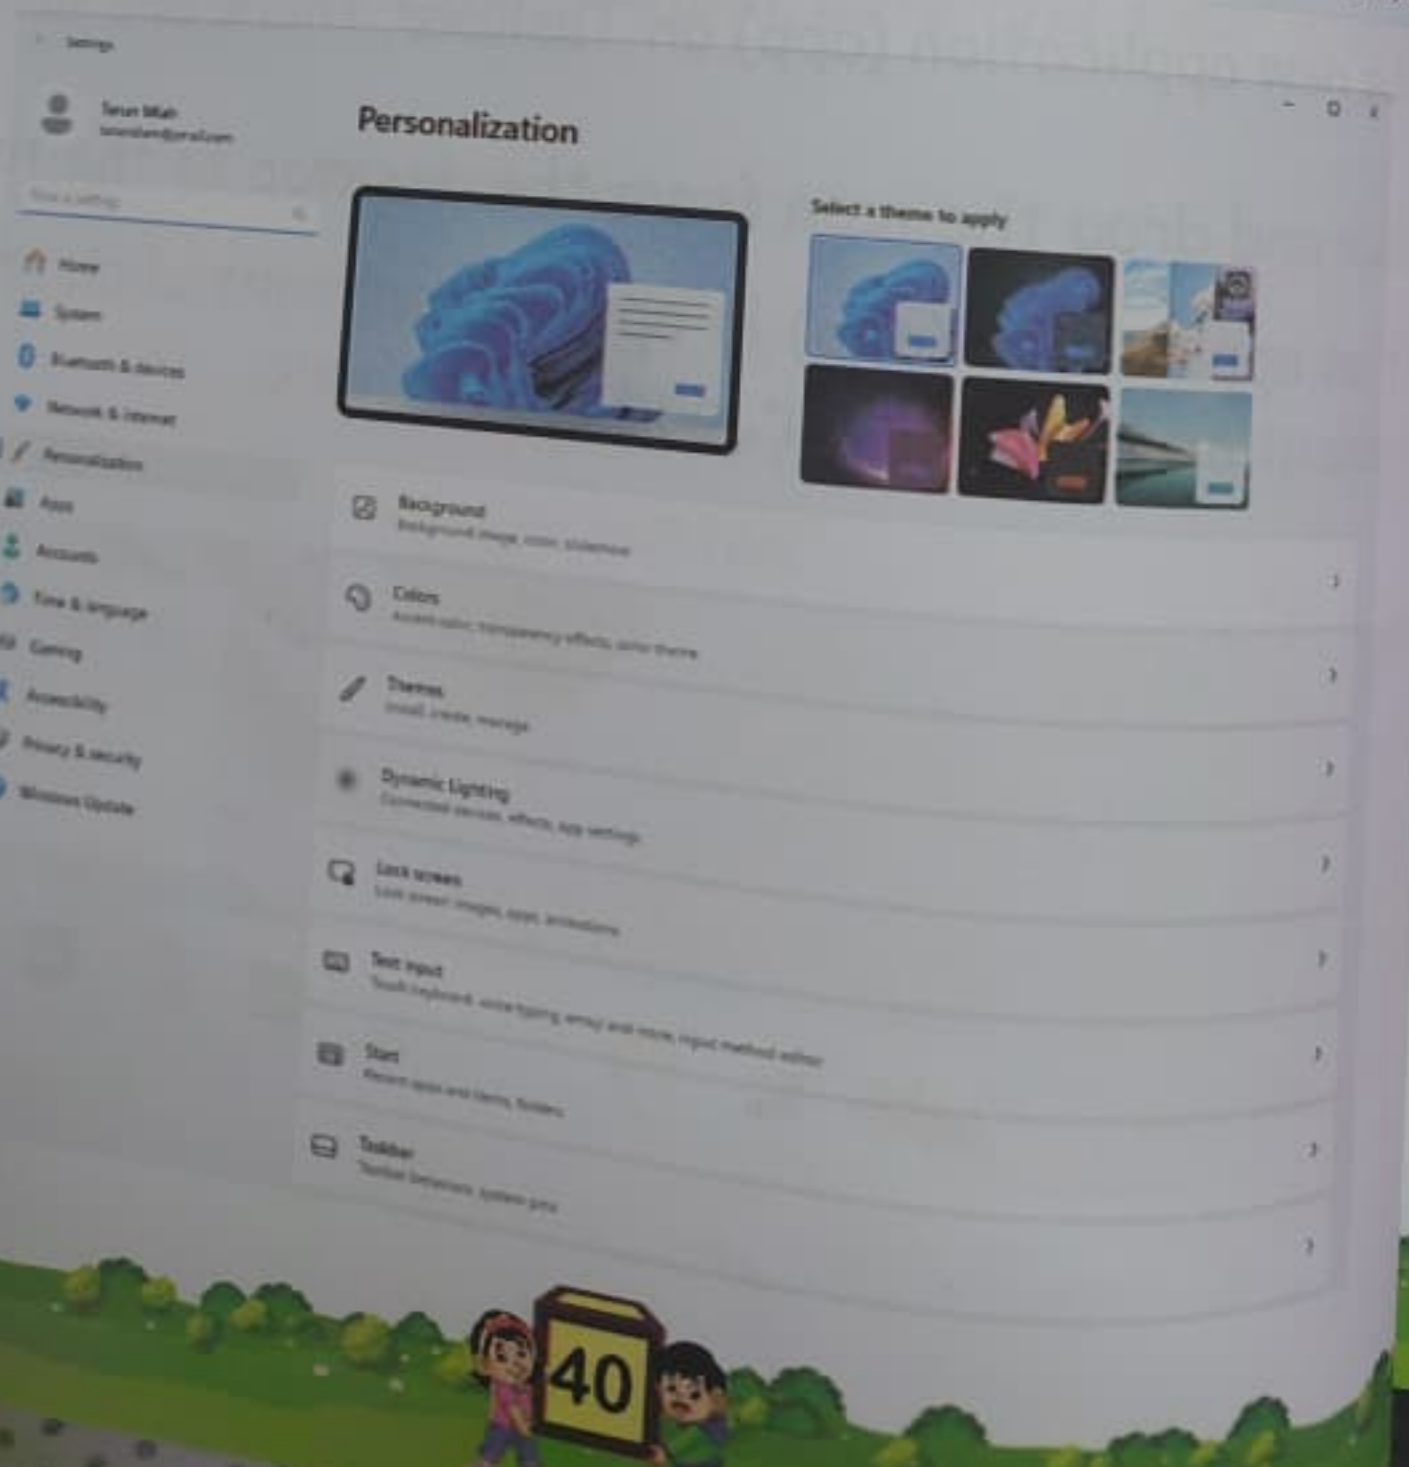

The Shortcut menu helps in getting the link faster. It appe
when you right click on any item.

3.5 Desktop Customization

You can change the desktop background as per your choice. You can change the desktop image and other options. To do that, Right click on the Desktop → choose Personalize

A list of options will appear, from where you can make your choice.

3.1 Features of Operating System and GUI

It is not possible to work on a computer without an Operating System. It is the most important software of a computer. It does many works, which includes helping the user communicate with the hardware components of the computer.

Graphic User Interface or GUI is a user friendly operating system, which gives us pictorial options to choose from. MS Windows is a popular GUI.

Let us learn more about Windows.

3.1.1 Desktop

It is the first screen that appears when the computer starts. It mainly contains the Taskbar, Start Button and the Icons of various items.

ACTIVITY [.. to be given in soft copy]

A. For the following words, correct the spellings by using the backspace button.

1. eeenglish
2. whhhite
3. greeeen
4. cleeear
5. yeellooww
6. raabbitt
7. zeeeebra
8. eeleephaaaant
9. ggiirrraafffeee
10. moooonkkeeeey

B. For the following words, correct the spellings by using the delete button.

1. watter
2. wwwooddd
3. flaaower
4. fffrrruit
5. treeeee
6. bananana
7. aapplee
8. maaanggooo
9. waaterrrmeeeloon
10. sstraawwbeerryy

C. For the following words, correct the spellings.

1. foooooootbaaaall
2. cricccckeeeeeeet
3. hooooockyyyyyy
4. baaaaadminnnnnntooooonn
5. teeennissss
6. ccccchesssssss
7. kabbbbaddddii
8. boxxxiiinnnggggg
9. sssqqqqqqquuuuuuasssssssh
10. wresssliingg

D. Type the following statements 10 times each.

1. XYLOPHONE IS A MUSIC INSTRUMENT.
2. CRICKET IS A POPULAR GAME.
3. CAPITAL OF NORWAY IS OSLO.
4. MY CITY IS A SMART CITY.
5. A VIRUS ATTACK HIT THE DEVICE.
6. ABCDE FGHIJ KLMNO PQRST UVWXYZ.

2B.1 Introduction

Notepad is a program that helps us to write something using the keyboard. The starting screen of Notepad is shown below —

It has some features that can be applied on the text, such as changing colour and size of the text. There are more features, which we will learn later.

2B.2 Uses of Notepad

- It is used to write simple text using the keyboard.
- It is easy to learn.
- These files are small in size.

2B.3 Application of Keyboard

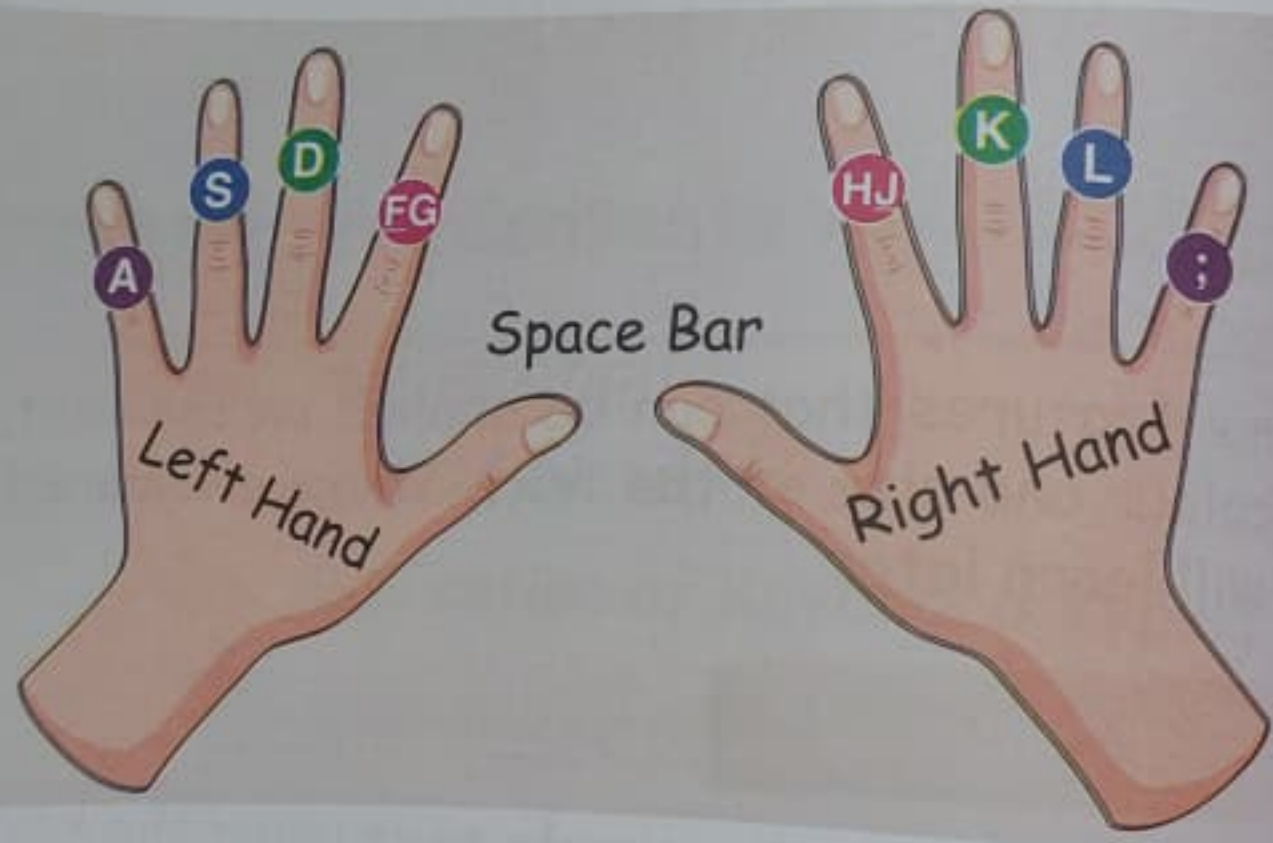

Do you know that it is possible to type using the keyboard without even looking at the keys? It can be done if you learn the keyboard typing lessons step by step. In this chapter, we will learn how to type on the keyboard without looking at the keys.

To learn the QWERTY keyboard, one should learn the keyboard fingers. One should not look at the keyboard while typing. In the following lessons, the keyboard keys are shown and the given text should be typed by looking at the alphabets given in the image in the pages.

LESSON I

Keep Left Hand Fingers On Letters A S D F

Keep Right Hand Fingers On Letters J K L ;

Type the following the given number of times –
