Continual Assessment 1

2026 - 2027

Primary 4

Information Technology

Part 2 (Answer Key)

Date: _____ Name: **TEACHER ANSWER KEY**

Instructions:

- Start answering the questions on time.
- Follow all instructions carefully.
- Answer all questions.
- Submit your paper within the given time.

Total marks	**35**
Part 2	**30**
CW	**5**
Marks Obtained	**30 / 30**

Section A: Multiple Choice Questions (MCQ) (8x1=8 marks)

For each question 1-8, four options are given. Circle the correct option i, ii, iii or iv.

1. How many bits of data does a Serial Port allow to be transmitted at a time?

i. Only 1-bit at a time **ii.** 100 bits at a time
iii. 1,000 bits at a time **iv.** Zero bits

2. Which computer port is used to connect a printer?

i. Parallel Port **ii.** Mouse Pad
iii. MS Paint **iv.** Game App

3. What is the main task of a Modem?

i. To spray ink on paper **ii. To convert signals over the Internet**
iii. To roll a ball with fingers **iv.** To cool the computer

4. A modem that stays inside the computer casing is called an:

i. External modem **ii. Internal modem**
iii. Paper modem **iv.** Laser modem

5. Where is the physical movement of a mouse displayed?

i. On the Monitor **ii.** Inside the Printer
iii. On the Keyboard **iv.** In the Modem

6. What is the shape of Tracks on the surface of a disk?

i. Triangular rings **ii. Concentric circular rings**
iii. Square boxes **iv.** Straight lines

7. What is a Sector on a disk surface?

i. A smaller pie-shaped segment/division of a track **ii.** A computer game
iii. A printer ribbon **iv.** A keyboard button

8. Which display screen also acts as an input device when touched with a finger or stylus pen?

i. Touch Screen **ii.** Dot Matrix Printer
iii. CPU Chip **iv.** Memory Card

Section B: True or False (5x1=5 marks)

9. Write True or False in the box provided for each of the following statements:

No.	Statement	True / False
i.	A Serial Port allows only 1-bit transmission at a time.	True
ii.	USB stands for Universal Serial Bus.	True
iii.	A Parallel Port cannot connect a printer.	False
iv.	Motherboard is an external hardware device.	False
v.	A Scanner is an input device that captures physical documents into digital files.	True

Section C: Fill in the Blanks (6x1=6 marks)

10. Fill in the blanks using the correct words from the box below:

Word Bank: [Modulator - Demodulator | Internal | CPU | Modem | Monitor | Hardware]

i. Modem stands for **Modulator - Demodulator**.

ii. A modem that stays inside the computer is called an **Internal** modem.

iii. **CPU** is known as the brain of the computer.

iv. The task of a **Modem** is to convert signals over the Internet.

v. Physical movement of a mouse is displayed on the **Monitor**.

vi. **Hardware** are the physical components that a computer is made up of.

Section D: Full Forms & Correcting Sentences (4+4=8 marks)

11. Write the full form of each abbreviation (4m) and rewrite the corrected sentences (4m):

Term	Full Form (1 mark each)	Term	Full Form (1 mark each)
i. CPU	**Central Processing Unit**	**iii. LCD**	**Liquid Crystal Display**
ii. USB	**Universal Serial Bus**	**iv. RAM**	**Random Access Memory**

No.	Incorrect Sentence	Corrected Sentence (1 mark each)
v.	Tracks are triangular rings on a disk.	**Tracks are circular rings on a disk.**
vi.	Motherboard is an external hardware device.	**Motherboard is an internal hardware device.**
vii.	All actions are controlled by ALU.	**All actions are controlled by the Control Unit (CU).**
viii.	A scanner is an output device.	**A scanner is an input device.**

Section E: Short Answer Questions (From Chapter 1A Review) (3x1=3 marks)

12. Answer the following questions briefly:

i. What is the function of a Motherboard? (1 mark)

An internal circuit board that allocates power and allows communication between the CPU, RAM, and other devices.

ii. State one difference between a Scanner and a Printer: (1 mark)

Scanner is an input device (captures documents into digital files); Printer is an output device (prints onto paper).

iii. State one difference between a Mouse and a Trackball: (1 mark)

A Mouse is moved across a surface, whereas a Trackball remains still and only its ball is rolled with fingers.
