Comprehensive Practice Worksheet & Study Guide [TEACHER ANSWER KEY]

Student Name: TEACHER COPY **Date:** _____

Class: Primary 6 **Chapters Covered: Ch 2 (OpenOffice I), Ch 3 (OpenOffice II)**

Section A: Fill in the Blanks using the Word Bank

Word Bank: [.odt • .ods • .odp • .odb • Primary Key • Equals (=) • AutoFill • Query • Form • F5]

1. The default file extension for an OpenOffice Writer document is _____. **(.odt)**
2. In OpenOffice Calc, every formula must begin with an _____ sign. **(Equals (=))**
3. The default file extension for an OpenOffice Calc spreadsheet is _____. **(.ods)**
4. A field that uniquely identifies each record in a database table is called the _____. **(Primary Key)**
5. The feature used to generate a series of numbers or dates quickly in Calc is called _____. **(AutoFill)**
6. The default file extension for an OpenOffice Impress presentation is _____. **(.odp)**
7. The function key used to run a slide show in OpenOffice Impress is _____. **(F5)**
8. An object in OpenOffice Base used for easy and user-friendly data entry is a _____. **(Form)**
9. An object in OpenOffice Base used to search and filter specific records from a table is a _____. **(Query)**
10. The default file extension for an OpenOffice Base database is _____. **(.odb)**

Section B: Write [T] for True or [F] for False

No.	Statement	Answer
1.	OpenOffice is an open-source software suite that can be downloaded freely.	**[T] (True)**
2.	In OpenOffice Calc, text values (labels) are automatically right-aligned by default.	**[F] (False - Left aligned)**
3.	A primary key field cannot contain duplicate or empty (null) values.	**[T] (True)**
4.	OpenOffice Calc allows calculations to be performed on plain text labels.	**[F] (False)**
5.	A single database table can have multiple primary keys.	**[F] (False)**
6.	Reports in OpenOffice Base are used to present formatted data for printing.	**[T] (True)**

Section C: Matching Application with Its Function & Extension

OpenOffice App	Description / Purpose	Extension	Answer
1. Writer	A. Spreadsheet program for calculations and charts	.odb	**1 → C (.odt)**
2. Calc	B. Database program for tables and queries	.odp	**2 → A (.ods)**
3. Impress	C. Word processing software for documents	.ods	**3 → D (.odp)**
4. Base	D. Presentation software with multimedia slides	.odt	**4 → B (.odb)**

Section D: Calc Functions & Formulas

Write the exact function name used for each task in OpenOffice Calc:

1. Calculates the total sum of numbers in cells A1 to A10: **=SUM(A1:A10)**
2. Finds the highest value in a range of numbers: **=MAX()**
3. Calculates the average of a range of values: **=AVERAGE()**
4. Finds the lowest value in a range of numbers: **=MIN()**

Section E: Short Answer Questions

1. What is Open Source Software?

Answer: Open-source software is software whose source code is freely available to the public for use, modification, and redistribution without licensing fees.

2. Differentiate between a Record and a Field in a Database table:

Answer: A Field is a vertical column that stores a specific category of data (e.g., Name, Age), while a Record is a horizontal row that stores complete information about one entity.

3. What is a Primary Key and why is it important in a Database?

Answer: A Primary Key is a unique field in a table that uniquely identifies each record. It prevents duplicate entries and ensures fast searching.
