SINGAPORE SCHOOL KINDERLAND

Primary-6 · Information Technology (IT)

CLASSROOM ACTIVITY & PRACTICE WORKSHEET 1 — COMPLETE ANSWER SHEET

Topic: *Chapter 1 — MS Access 2010 (Database Basics, DBMS, Tables, Records & Fields)*

Student Name: TEACHER COPY / ANSWER KEY	Class: Primary 6 ___	Date: 2026-2027

Activity 1: Match the Database Terms with their Meanings

Database Term	Definition / Description	Solution / Answer
1. Database	A. A vertical column that stores data of the same type	1 → C (Integrated collection of records in tables)
2. DBMS	B. A horizontal row containing complete information	2 → D (Software set that controls database)
3. Table	C. An integrated collection of logically-related records	3 → E (Collection of data in rows and columns)
4. Record	D. Software programs that control creation of database	4 → B (Horizontal row with complete info)
5. Field	E. A collection of related data organized in rows & columns	5 → A (Vertical column storing same type of data)

Activity 2: Multiple Choice Questions (Tick ✔ the correct option)

1. Which of the following is a database software program?
   [ ] a) MS Word [✔] **b) MS Access** [ ] c) MS Paint → **Answer: b) MS Access**
2. In a database table, a vertical column is called a:
   [ ] a) Record [✔] **b) Field** [ ] c) File → **Answer: b) Field**
3. A single horizontal row containing complete details of one student is a:
   [✔] **a) Record** [ ] b) Field [ ] c) Database → **Answer: a) Record**
4. Which of the following is NOT an example of DBMS software?
   [ ] a) FoxPro [ ] b) FoxBASE [✔] **c) Windows Media Player** → **Answer: c) Windows Media Player**

Activity 3: True or False Quick Drill

a) A database offers an organized mechanism for storing and retrieving data easily. [**True (T)**]

b) A Field in a table is arranged horizontally. [**False (F)** — *Fields are arranged vertically as columns*]

c) A school database can contain multiple tables like Student, Library, and Staff. [**True (T)**]

d) MS Access, FoxPro, and FoxBASE are all examples of DBMS software. [**True (T)**]

e) A Record contains data about only one single field. [**False (F)** — *A Record contains complete details across all fields*]

Activity 4: Fill in the Blanks with the Word Bank

Word Bank: [DBMS | Table | Record | Database | Field | Easily]

1. A **Database** is an integrated collection of logically-related records stored in tables.
2. A **DBMS** is a set of computer programs that controls the creation and use of a database.
3. A **Record** is one row arranged horizontally in a table that contains complete information.
4. A **Field** is a column arranged vertically that stores data of the same type.
5. A **Table** is a collection of related information arranged in rows and columns.
6. Database arrangement allows information to be searched and retrieved **Easily**.

Activity 5: Visual Table Analysis: Study the "Student" Table Below

Admission No. (Field 1)	Student Name (Field 2)	Class (Field 3)	Phone Number (Field 4)
1001	Ayaan Rahman	Primary 6 A	01711-223344
1002	Sarah Chowdhury	Primary 6 B	01822-334455
1003	Zainab Ahmed	Primary 6 A	01933-445566

a) How many **Fields** (columns) are in the table above? Name any two fields.

➔ **Answer: 4 Fields** (Admission No., Student Name, Class, Phone Number)

b) How many student **Records** (rows) are displayed in this table?

➔ **Answer: 3 Records** (Ayaan Rahman, Sarah Chowdhury, Zainab Ahmed)

c) Which field stores only the names of the students?

➔ **Answer: Student Name field**

Activity 6: Real-World Database Thinking & Practice

1. Name three different places/organizations where a database is commonly used:

➔ **Answer: 1. School 2. Library 3. Bank** (or Hospital, Airline)

2. Name two popular DBMS software programs other than Microsoft Access:

➔ **Answer: 1. FoxPro 2. FoxBASE**

3. If you are designing a **Library Table**, list three Fields you would include to track books:

➔ **Answer: Book Code, Subject / Title, Author** (Publisher / Cost / Issue Date)

Activity 7: Short Definition Review (In Your Own Words)

a) What is a Database?

➔ **Answer:** A database is an organized collection of related data stored in tables so that it can be easily stored, managed, and retrieved.

b) What is a DBMS (Database Management System)?

➔ **Answer:** A DBMS is a set of computer programs that controls the creation, maintenance, and use of a computerized database.
