SINGAPORE SCHOOL KINDERLAND

Department of Information Technology & Computer Science · Academic Year 2026–2027

PRIMARY 6 · IT CLASS TEST 2 (TERM 2) · QUESTION PAPER

Syllabus: Chapter 3 OpenOffice II: Calc (Spreadsheets) & Base (Databases) | Time: 45 Mins | Total: 25 Marks

Student Name: _____	**Roll Number:** _____	**Section:** P6 [ ]
Date of Exam: _____	**Time Allowed:** 45 Mins	**Marks Obtained:** / 25

SECTION A: MULTIPLE CHOICE QUESTIONS [5 × 1 = 5 MARKS]

1. What must every formula begin with in OpenOffice Calc?
   (a) # (b) = (c) & (d) @

2. The unique address formed by the intersection of column D and row 8 is written as:
   (a) 8D (b) D-8 (c) D8 (d) #D8

3. Which pre-defined function calculates the arithmetic mean of a range of values?
   (a) TOTAL (b) MEAN (c) AVERAGE (d) MEDIAN

4. In OpenOffice Base, a single horizontal row containing all details about one person is called a:
   (a) Field (b) Record (c) Database (d) Cell

5. Which database key uniquely identifies each record and strictly prevents duplicate entries?
   (a) Foreign Key (b) Master Key (c) Primary Key (d) Super Key

SECTION B: FILL IN THE BLANKS [5 × 1 = 5 MARKS]

1. The small box in OpenOffice Calc that displays the cell coordinate of the active cell is the _____.

2. OpenOffice Base is a software categorized as an _____ (Relational Database Management System).

3. To count how many cells contain numeric data in cells B1 through B10, we use the formula _____.

4. A vertical column that represents a specific attribute (such as BirthDate or Student_ID) is a _____.

5. In Base, a _____ is used to search, retrieve, and filter specific records that match given criteria.

SECTION C: SPREADSHEET ANALYSIS & FORMULA CALCULATION [5 MARKS]

Examine the school cafeteria inventory sheet below and answer questions 1 to 4:

	A (Item Name)	B (Quantity Sold)	C (Unit Price in BDT)	D (Total Revenue)
1	Apple Juice	30	50	[Formula 1]
2	Chicken Sandwich	45	80	[Formula 2]
3	Chocolate Milk	25	40	[Formula 3]
4	**Total Revenue**		**Sum of All Items:**	[Formula 4]

1. Write the exact formula required in cell **D1** to calculate Apple Juice Total Revenue: _____

2. Write the formula using a pre-defined function to calculate the Grand Total Revenue in cell **D4**:

_____

3. Write the formula to find the **Maximum** quantity sold among the items: _____

4. What error code appears in Calc if a cell is too narrow to display a long number? _____

SECTION D: OPENOFFICE BASE DATABASE DESIGN [5 MARKS]

Kinderland School maintains a library table named **tbl_Books** with the following field columns:

Field Name	Sample Data	Appropriate Data Type (Text / Number / Date / Yes/No)
Book_ID	BK-1004	(a) _____
Title	Computer Science for Level 6	(b) _____
Price	450.00	(c) _____
Date_Purchased	15/02/2026	(d) _____
Is_Available	Yes	(e) _____

1. Which of the above fields should be chosen as the **Primary Key**? Justify your answer in one sentence:

Field: _____. Justification: _____

SECTION E: DESCRIPTIVE TECHNICAL QUESTIONS [5 MARKS]

1. **Calc vs Base Comparison:** State TWO key differences between a Spreadsheet (Calc) and a Database (Base): [2 Marks]

Difference 1: _____

Difference 2: _____

2. **Forms & Reports in Base:** Explain the practical purpose of: [2 Marks]

(a) **Forms:**

(b) **Reports:**

3. **Data Redundancy:** What does "data redundancy" mean, and how does using a database prevent it? [1 Mark]
