Concept 1: The Monitor & The CPU (The Face & The Brain)

A desktop computer has many parts working together like a helpful team! Just like a car has an engine, wheels, and lights, a computer has special parts for each job:

1. The Monitor:

- Looks like a **television screen**.
- Displays all that you **type, write, or paint**.
- Shows letters, numbers, movies, cartoons, and games!

2. The CPU (Central Processing Unit):

- It is called the **BRAIN** of the computer.
- Without a CPU, the computer is **useless** as it does the main work!
- It sits inside a tall box called the **CPU Cabinet**.

Activity 1.1: Trace & Write the Words (Handwriting Practice)

1. M O N I T O R → _____ → _____

2. C P U → _____ → _____

3. B R A I N → _____ → _____

Activity 1.2: Match the Function to the Correct Part

(A) I look like a television screen. 1. [ ] CPU

(B) I am called the brain of the computer. 2. [ ] MONITOR

(C) I sit inside a tall cabinet box. 3. [ ] MONITOR

(D) I display whatever you paint or type. 4. [ ] CPU

Activity 1.3: Choose the Correct Answer (Circle the Best Option)

1. Which part of the computer is called its brain? (**Monitor** / **CPU** / **Chair**)

2. The monitor looks like a: (**Book** / **Television** / **Clock**)

3. Can a computer work without its CPU brain? (**YES** / **NO**)

🎨 Creative Lab: Draw & Label the Monitor and CPU!

Draw the TV screen of the Monitor displaying a smiley face, and draw the tall CPU Cabinet box with its power button beside it:

[Draw Monitor Here] [Draw CPU Box Here]
