CHAPTER 3 · LESSON 1: INTRODUCTION TO COMPUTER NETWORKS

Concept: A Computer Network consists of two or more computers connected together to share data, files, and hardware (like printers). The three main types based on geographical distance are LAN, MAN, and WAN.

Activity 1: Fill in the Blanks with Word Bank [LAN, Network, Printer, Cable]

1. When two or more computers are connected together, they form a _____.
2. A network that connects computers in a single room or school lab is a _____.
3. Network computers can share hardware resources like a central _____.
4. Computers can connect through wireless signals or physical network _____.

Activity 2: Network Types Matching

1. LAN -> (A) Spans across entire countries or the whole world
2. MAN -> (B) Covers a single building or school computer lab
3. WAN -> (C) Connects computers across an entire metropolitan city
