■ CHAPTER 5A: MS WORD • LESSON 10: THE WORD WINDOW (Pages 52–53)

■ **Word Processing & Window Parts (Pages 52–53):**
• **Word Processing** is using a computer to create, edit, format, and print documents.
• **Word Processor:** Software that helps us type matter on a computer (e.g. Microsoft Word).
• The MS Word Window has 6 main components that help us create beautiful documents!

Component	Screen Location	Function / Job
1. Quick Access Toolbar	Top-Left corner	Contains quick one-click shortcuts: Save, Undo, Redo
2. Title Bar	Very top center	Displays the name of the document and program (MS Word)
3. Ribbon	Below Title Bar	Wide strip holding Tabs (Home, Insert) and tool button Groups
4. Document Area	Center workspace	The large blank white typing page with blinking cursor
5. Rulers	Top and left margins	Horizontal and vertical measurement scales for margins
6. Scroll Bar	Right and bottom edge	Sliders used to scroll document view up, down, left, right

═■ WORK TO DO 21: Word Window Detective Match-Up

1. Where do you look to see the name of your file?	**Title Bar**
2. Where are the quick Save, Undo, and Redo buttons found?	**Quick Access Toolbar**
3. Where is the blinking cursor where you type your words?	**Document Area**
4. What tool helps you slide down a 10-page document?	**Vertical Scroll Bar**
5. What tool helps you set top and side page margins?	**Rulers**
6. Where are formatting buttons organized under Home Tab?	**Ribbon**

═■ WORK TO DO 22: Word Window Mastery Check

Which part of the MS Word window do you use to quickly undo a mistake without touching the keyboard?

Model Answer / Key: The Quick Access Toolbar (click the curved Undo arrow icon).
(Teacher Evaluation: Award full credit for equivalent correct explanation in student's own words.)

What is the blinking vertical line on the document area called, and what does it show?

Model Answer / Key: The cursor; it shows the exact position where your next typed letter will appear.
(Teacher Evaluation: Award full credit for equivalent correct explanation in student's own words.)

Why does MS Word have both a horizontal ruler and a vertical ruler?

Model Answer / Key: Horizontal ruler sets left and right margins; vertical ruler sets top and bottom page margins.
(Teacher Evaluation: Award full credit for equivalent correct explanation in student's own words.)
